

**REMARKS**

Very thanks for Examination's suggestion and thanks for finding the original claim 4 is partly incorporated into the claim 2, it may result in new issues. Examiner has kindly pointed out which is different from the original claim 4, and thus the applicant decides to add the missing words of claim 4 to the claim 2. It is expected that the cancelled claim 4 add its feature to the claim 2 without new matters added in between the claim 2 and claim 4.

Thereby, it is assured that the new claims 2,6,8 and 10 are based on the original claims and thus no new matter is added.

Since in above discussion, it is apparent that no prior art has the features of the present invention, especially in new claim 2. Furthermore, as we know that no other prior art has features of the present invention. Thus, the present invention is novel and inventive.

It is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectively requested.

Respectfully submitted.

## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant Tsaor, Art Unit: 3677  
Chang-Wen  
Series No 10/666,781 Examiner: Jack W. Lavinder  
Filed September 22,  
2003  
Title Upper stopper structure of zipper

Mail Stop Amendment  
Honorable Assistant Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22311-1450

Sir:

Responsive to the Official Action date 08 / 22 / 2005, please amend the above-referenced Patent Application and first reply for response within first 2 month as following:

According to the office action, the applicant amends the Claim 2, and cancels the claim 4, adds the feature of claim 4 to the claim 2. The informality in claim 2, line 16 now is corrected as instructed. In the original specification Page 7 lines 6,7 about Figs 10, the antecedent basis of Claims 6, 10 "a recess at a lateral side of the head of the teeth strip" was described as "the concave openings at the lateral edges of the teeth head of the teeth (103)", more details about the effect of the blocks (15,35) matched to the concave openings or recess is described in the same paragraph.
